PROFESSIONAL PROFILE

Developer focused on Python, data science, and practical solutions. Passionate about creating software that delivers real value through data analysis and efficient development.

EDUCATION

Metropolitan University – Caracas, Venezuela

Systems Engineering

Experiences and projects

Fullstack Developer (Agricultural Web Project)

I developed an institutional platform with Astro for high performance and fast loading as requested by the organization.

Data Scientist (Bank Churn)

Generate a predictive model of customer churn with ~80% accuracy using Python and Data Science tools such as Pandas, Numpy, Matplot, etc., as well as EDA and Data Cleaning and Outlier handling.

Strategic Analysis (Fortune 500)

Creation of data pipelines to evaluate ROI and AI adoption in different sectors and in the 500 most valuable companies in the world.

Web Developer (NASA API)

Interactive application with real-time data using Python and Reflex, connecting the front end to the NASA API.

Skilld

Software and Tools: Python, Data Science Tools, SQL, Astro, Reflex, Streamlit

Language: Good command of English | Level B1-B2 | 6-month immersion courses in London and native Spanish

Skills: Self-taught, Problem-solving, Clear communication, Teamwork, Adaptability, Analytical thinking

ADDITIONAL TRAINING

I have received training from several complementary courses in Python, Data Science, and Web Development.
